AI Engineer

SUMMARY

Generative AI Developer building production RAG pipelines, multi-step agents, and FastAPI backends end-to-end. Proven across CRM integrations, e-learning platforms, and benchmarked retrieval systems. Independent, full-stack AI ownership from data layer to deployment.

RELEVANT EXPERIENCE

AI Engineer

Jan 2026 - present

6 Sigma Code

Remote — Fulltime

- Built Odoo-integrated agent executing CRM actions from natural language prompts.
- Automated document classification and chunking pipeline, improving RAG retrieval accuracy.
- Owned full backend independently — FastAPI, PostgreSQL, AI logic, and all integrations.

Tech Lead

Jul 2025 - present

Axiora

- Piloted with real companies pre-launch; targeting Q3 2026 launch.
- Architected the backend and AI layer — agentic analysis with LangChain and FastAPI.
- Deployed full stack to production — backend, PostgreSQL, Redis, and UI.

Data Engineering Mentor

Oct 2024 - Jun 2025

Microsoft Student Club

Online

- Mentored 50 students in SQL and data engineering — awarded “Best Mentor”

TECHNICAL SKILLS

- Programming Languages:** Python, SQL, Java, C++
- Gen AI & LLM:** LangChain, LangGraph, CrewAI, ChromaDB, FAISS, OpenAI API, Prompt Engineering
- Backend & APIs:** FastAPI, SQLAlchemy, Pydantic, asyncio, Requests, BeautifulSoup4
- Databases:** MySQL, PostgreSQL, T-SQL, MongoDB, Redis, InfluxDB
- Data Processing:** PySpark, Kafka, Pandas, Polars
- DevOps & Cloud:** Docker, Railway, AWS (S3, IAM, VPC, RDS, EC2), Grafana, Supabase, Vercel, Upstash

PROJECTS

AI Data Analysis Platform (Graduation - A+) | Langchain — SQLAlchemy [Github Repo](#).

Oct 2024 - Jul 2025

- Led 10-person team as **Team Leader** — wrote all tasks, conducted code reviews, delivered on schedule.
- Delivered full data analysis reports — charts, stats, and summaries — in under 1 minute.
- Integrated local LLMs via Ollama (Llama 3.2), eliminating API costs and data privacy risks.

ProofRAG | LangChain — FAISS [Github Repo](#).

May 2025

- Benchmarked 4 RAG combinations across 2 embedding and 2 retrieval strategies.
- Proposition embedding achieved 80–90% pass rate via 4-criteria LLM quality filtering.
- Engineered proof extraction layer linking every answer to exact source segments.

Kafka Air Quality Pipeline | Java — Kafka [Github Repo](#).

Sept 2024

- Ingested real-time sensor data through a Kafka streaming pipeline, distributing it to multiple consumers including **InfluxDB** and **Redis**.
- Built a **PySpark** ETL pipeline to extract, transform, and load streaming data into a **PostgreSQL** data warehouse.
- Visualized processed data through a real-time **Grafana** dashboard connected to the live pipeline.

EDUCATION

Kafrelsheikh University

Oct 2021 – Jul 2025

Faculty of Artificial Intelligence (Bachelor of Artificial Intelligence).

GPA: 3.2

LANGUAGE

- Arabic:** Mother Tongue.
- English:** B2 (CEFR).
